Arjang Talattof, Ph.D.

Building robust & scalable data systems. US Citizen and UK ILR.

TECHNICAL SKILLS

- Python, Rust, C++, SQL, Cloud infrastructure (AWS, GCP)

EXPERIENCE

META **Bay Area, CA**
AI Research - Data Lead (IC6) *Jan 2020 – Current*
FAIR

- Advancing the state-of-the-art in artificial intelligence through open research for the benefit of all.
- Specializing on data pipelines and LLMs
- https://ai.meta.com/research/

RealityLabs Research

- Developing the next generation of computation in Reality Labs Research, building the digital interface for the physical world via Project Aria (see https://about.meta.com/uk/realitylabs/projectaria/)
- **Semantic Search** – *Python*
  - Enable discoverabilty and reusability of multi-modal (text, audio, video, images) datasets by developing a unified search API and powering semantic queries through the use of large transformer (e.g. CLIP, ImageBind, Whisper) models to extract embeddigns
- **Geospatial Ingestion and Indexing** – *Python, C++*
  - Creator and maintainer of pipeline, enabling geographic search for raw data
- **Distributed Computing** – *Python, C++*
  - Enabled distributed computing to run large-scale optimization libraries on Meta cloud infrastructure

SCAPE TECHNOLOGIES **London, UK**
Machine Learning Engineer *Aug 2017 – Jan 2020*

- **Acquired by Facebook January 2020**
- Building core data flow and analysis pipeline for location-based recognition, allowing devices to see and remember their surroundings and augment the world around them. Cloud infrastructure allows ordinary mobile devices to enhance the world around them by overlaying digital items onto the physical world, both indoors and outdoors, using machine vision and artificial intelligence.
- **Large-Scale Structure-from-Motion Pipeline** – *Python, C++, PyTorch, AWS, PostgreSQL, Redis*
  - Deploying and optimizing large computer vision end-to-end processing pipeline.
  - Developing and optimizing code base to improve runtime and significantly reduce costs.
  - Deep learning-based global image feature extraction and large-scale image retrieval.
  - Custom cloud-based graph database deployment for geospatial image data used in pipeline to build 3D geometric models.

DELOITTE CONSULTING LLP **Roslyn, VA, USA**
Senior Consultant *Aug 2016 – Jul 2017*

- Mission Analytics in Business Model and Transformation/Strategy and Operations.
- Supporting senior government executives in the development of the organization's strategy and business process
- **Distributed Graph Database Analytics** – *Scala, Java, Kafka, Cassandra/NoSQL*
  - Leveraging Cassandra and Spark for large-scale graph networks and analyses including:
    * Migration of client data from on-prem to cloud (AWS)
    * Building tools to explore and analyze graph data in a distributed system
    * Developing machine learning algorithms and automation of real-time entity resolution (data disambiguation) at scale.
    * Revenue increase from $1.8M to $6.0M; internal investment by firm ($0.5M) to generalize new capability based on client deliverable (see https://www2.deloitte.com/content/dam/Deloitte/de/Documents/operations/knowledge-graphs-pov.pdf)

US FOOD AND DRUG ADMINISTRATION **Silver Spring, MD, USA**
Quantitative Research Fellow *Jul 2015 – Aug 2016*

- Division of Quantitative Methods and Modeling in the Office of Research and Standards within the Office of Generic Drugs.
- Applying mathematical analysis to physiological/molecular based models for drug absorption, bioavailability, distribution and effectiveness. Using large data sets to improve the prediction and regulatory decision making for generic drugs.

EDUCATION

University of Michigan **Ann Arbor, MI, USA**
PhD Pharmaceutical Sciences *Sep 2009 – May 2015*

- *Mechanistic Analysis and Quantification of Gastrointestinal Motility: Physiological Variability and Plasma Level Implications*

New York University **New York, NY, USA**
MSc Computational Biology *Sep 2007 – May 2009*

University of Arizona **Tucson, AZ, USA**
BSc Mathematics *Aug 2002 – Jun 2006*
